

LOW PROFILE FLAT TOP SHOWER TRAYS

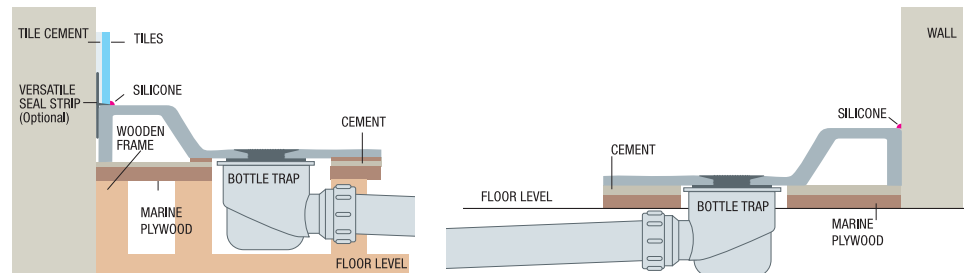

The patented MX Low Profile shower tray has been specifically designed to complement all of the latest trends in the modern bathroom.

At only 45mm high, this stylish and contemporary tray enhances the minimalist look that is so sought after today.

It is ideal for use with frameless enclosures and allows a watertight seal by tiling to the outer rim. Maximum showering space can be achieved because the whole width of the tray can be used. These trays are easily converted to a 'upstand' by using the MX Versatile Seal Strip.

Available in all popular shapes and sizes the MX Low Profile tray comes **complete with a 90mm High Flow shower waste** that is specifically designed for this type of tray.
